

Course Title	COMPUTER SYSTEMS AND INTERNET TECHNOLOGY				
Course Code	CST-110				
Course Type	Elective				
Level	Undergraduate				
Year / Semester	1 / One				
Teacher's Name					
ECTS	5	Lectures / week	3	Laboratories / week	
Course Purpose and Objectives	This module provides an overview of the layered nature of computer systems and how the use of simple interfaces can make the design of complex and powerful systems possible.				
Learning Outcomes	<p>On successful completion of this module, students should be able to:</p> <ul style="list-style-type: none"> ▪ discuss the impact that growing sources of information such as the Internet are having on society ▪ identify and discuss examples of legal, ethical, security and privacy issues relating to the use of Internet based computer systems ▪ demonstrate an understanding of modern Internet tools and be able to create simple web sites including JavaScript scripting, forms and the use of Web-enabled Databases.
